1982 Enterprise Statistics

ES82-1

General Report on Industrial Organization

U.S. Department of Commerce
BUREAU OF THE CENSUS

The publications
from the 1982 Economic and
Agriculture Censuses are dedicated
to the memory of Shirley Kallek,
Associate Director for Economic Fields.
During her career at the Bureau of the
Census (1955 to 1983), she continually
directed efforts to improve
the timeliness and accuracy of
economic statistics.

1982 Enterprise Statistics

ES82-1

General Report on Industrial Organization

Issued October 1986

U.S. Department of Commerce
Malcolm Baldrige, Secretary
Clarence J. Brown, Deputy Secretary
Robert Ortner, Under Secretary
for Economic Affairs

BUREAU OF THE CENSUS
John G. Keane,
Director

BUREAU OF THE CENSUS

John G. Keane, Director

C. L. Kincannon, Deputy Director

Charles A. Waite, Associate Director for Economic Fields

Roger H. Bugenhagen, Assistant Director for Economic and Agriculture Censuses

Thomas L. Mesenbourg, Chief Economic Census Staff

ECONOMIC SURVEYS DIVISION

W. Joel Richardson, Chief

ACKNOWLEDGMENTS—Many persons participated in the various activities of the 1982 Enterprise Statistics Program. Primary direction of the program was performed by **Shirley Kallek,** Associate Director for Economic Fields (until May 1983), **Charles A. Waite,** her successor, and **Michael G. Farrell,** Assistant Director for Economic and Agriculture Censuses (until August 1984), and **John H. Berry** (until April 1986) and **Roger H. Bugenhagen,** his successor, and **Thomas L. Mesenbourg,** Chief, Economic Census Staff.

This report was prepared in the Economic Surveys Division under the general direction of **W. Joel Richardson,** Chief. **Robert E. Crowther,** Assistant Chief for Data Programs (until October 1984), and **Alan I. Blum,** his successor, were responsible for overall planning and management of the division's data programs and also coordinated activities with other divisions. **John A. Dodds,** Chief of the Enterprise Statistics Branch, supervised all phases of the planning, specifications development, data collection, editing, and compilation of this report. Staff assistance was provided by **Johnny Monaco, Lorraine Tischler, Audrey Nue, William Fitzpatrick, Alicia Townshend, Cynthia Schott, Alfred Nucci, Theresa Brashears, Frances Tucker,** and **Elaine Emanuel.** The computer programs were developed under the direction of **Andrew L. Grieco,** Assistant Division Chief for Data Processing (until February 1985), and **Mitchell L. Trager,** his successor. **Charles Venters,** Chief of the Economic Programming Branch, assisted by **Wilbur Shipp, Edward Carr, Ray Abercrombie, Greta Holland, Doug Bedwell, Frank Frederick, Johnny Lee, Pilar Baden, David Krystosek,** and **Noel Villanueva,** was responsible for planning and implementing the programs.

General purpose programs for editing developed in the Statistical Research Division were adapted for the Enterprise Statistics Program by **Rita Surdi** and **Thomas Petkunas** under the direction of **Brian Greenberg.**

Planning, design, review, and composition of report forms were performed in the Administrative Services Division, **Robert L. Kirkland,** Chief (until March 1986) and **Michael G. Garland,** his successor.

Publication planning, design, editorial review, composition, and printing procurement were performed in the Publications Services Division, **Raymond J. Koski,** Chief (until January 1985), and **Walter C. Odom, Jr.,** his successor.

Geographic coding procedures and associated computer programs were developed in the Geography Division, **Robert W. Marx,** Chief.

Mailout preparation and receipt operations, clerical and analytical review activities, data keying, and geocoding review were performed in the Data Preparation Division, **Don L. Adams,** Chief.

Computer processing was performed in the Computer Services Division, **C. Thomas DiNenna,** Chief (until February 1984), and **John E. Halterman,** his successor.

Photocomposition programs for the statistical tables were developed in the Systems Support Division, **Larry J. Patin,** Chief (until October 1983), and **Arnold E. Levin,** his successor.

The overall planning and review of the census operations were performed by the staff of the office of the Assistant Director for Economic and Agriculture Censuses.

Special acknowledgment is also due the many businesses whose cooperation has contributed to the publication of these data.

ECONOMIC AND AGRICULTURE CENSUSES OVER TIME

The early beginnings of America's industrial output were first measured in the United States in the 1810 Decennial Census and again in 1820, when questions on manufacturing were included with those for population. Beginning with the 1840 Decennial Census, there were enumerations of manufactures and mineral industries at 10-year intervals up to and including the year 1900 for manufactures and 1940 for mineral industries.

Because of the increasing dominance of manufacturing in the early 20th century, Congress directed that quinquennial censuses of manufactures be taken beginning in 1905. However, from 1919 through 1939, these censuses were conducted every 2 years. The need for war-related current surveys in the early 1940's postponed the next census of manufactures until 1948 (for 1947).

Retail and wholesale trade data were first collected in 1930, and in 1933 information on selected service industries was added to the data-collection operation. These business censuses, as they were called, were again taken for 1935, 1939 (as part of the 1940 decennial program), and 1948.

Information on construction industries was first obtained in 1930 and again for 1935 and 1939.

An integrated economic census program was begun in 1954 covering the censuses of retail and wholesale trade, selected service industries, manufactures, and mineral industries. These censuses previously had been taken on an independent basis. The enterprise statistics program, which publishes combined data from the economic censuses, was made possible with the implementation of the integrated economic census program in 1954. Subsequent integrated economic censuses were taken covering the years 1958, 1963, and 1967. The census of construction industries, suspended during World War II like the censuses of business, manufactures, and mineral industries, was not resumed until 1967 when it was added to the integrated program. Beginning with the 1967 censuses, Congress authorized the economic censuses to be taken at 5-year intervals covering years ending in 2 and 7.

The need for transportation data to supplement information available from existing governmental or private sources was recognized by Congress in the late 1950's and early 1960's. The census of transportation (consisting of several surveys) was first taken for 1963 and again for 1967.

Since 1967, all of the above censuses have been taken quinquennially as part of the Census Bureau's economic census program. (For the 1977 censuses, the coverage of the service industries was broadened from "selected services" to all services, except religious organizations and private households. A total of 41 additional four-digit standard industrial classifications[1] (SIC's) in 7 SIC major groups were added to the scope of the census. While most of the industries included for the first time for 1977 were covered again for 1982, some were not, i.e., hospitals; elementary and secondary schools; colleges, universities, and professional schools; junior colleges and technical institutes; labor unions; and political organizations.)

The first manufacturing census for an outlying area was conducted in Puerto Rico for the year 1909. Thereafter, with the exception of 1929, a census was taken at 10-year intervals through 1949. The first censuses of retail trade, wholesale trade, and selected service industries in Puerto Rico were conducted for 1939. These censuses also were taken for the years 1949, 1954, 1958, 1963, and 1967. A census of construction industries was first introduced in Puerto Rico for 1967. These censuses of Puerto Rico have been taken since then for the years 1972, 1977, and 1982.

Censuses of manufactures, retail trade, wholesale trade, and selected service industries were conducted in Guam and the Virgin Islands of the United States for 1958, 1963, 1967, 1972, 1977, and 1982. Censuses of mineral industries were taken in the Virgin Islands of the United States for the years 1958, 1963, and 1967 but not since that time. A census of construction industries was also undertaken in these areas for 1972, 1977, and 1982.

Retail trade, wholesale trade, selected service industries, manufacturing, and construction industries were canvassed for the first time in the Northern Mariana Islands in 1983 (for 1982).

The surveys of minority-owned business enterprises and women-owned businesses have been included as special programs of the economic censuses since 1977. The first survey of minority-owned businesses was done in 1969 and then in 1972. The survey of women-owned businesses was initially done in 1972.

For 1982, the economic censuses and agriculture census were conducted concurrently.

The first agricultural census data were collected in 1840 as part of the sixth decennial census. A census of agriculture was part of each decennial census program until 1920. Since 1920, a national census of agriculture has been taken every 5 years covering years ending in 4 and 9. However in March 1976, these reference years were changed to 1978, 1982, and every 5 years thereafter, to coincide with the economic censuses.

USES OF THE ECONOMIC AND AGRICULTURE CENSUSES

The economic censuses are the major source for facts about the structure and functioning of the Nation's economy and provide essential information for government, business, industry, and the general public. They provide an important part of the framework for such composite measures as the gross national product, input-output measures, indexes of industrial production, and indexes measuring productivity and price levels. Information from the censuses is used to establish sampling frames and as benchmarks for current surveys of business activity, which are essential for measuring short-term economic conditions.

State and local governments use census data to assess business activities within their jurisdictions. The private sector uses the data to forecast general economic conditions; analyze sales performance; lay out sales territories; allocate funds for advertising; decide on locations for new plants, warehouses, or stores; and measure potential markets in terms of size, geographic areas, kinds of business, and kinds of products made or sold.

Census of agriculture statistics are used in a variety of ways. As benchmarks, they are the bases for establishing trends for many of the year-to-year estimates and projections made by the U.S. Department of Agriculture. They also provide a base to identify areas or universes suitable for sample surveys by the Department of Agriculture, State governments, universities, and private institutions.

Federal, State, and local agencies use the data for planning rural development, agricultural research, and extension work. These data serve as criteria for determining the economic agricultural base of a county and for analyzing that economy and its resources.

Farm cooperatives, commodity and trade associations, and agribusiness corporations use the data to aid in locating new plants and service and distribution centers; allocating research funds; forecasting markets; selecting marketing areas; and making advertising and other marketing decisions. This improves the farmers' access to markets and suppliers, too. Actions by these various agribusiness groups increase competition and generally provide the farmer with improved marketing and purchasing alternatives.

Following every census, thousands of businesses, agricultural groups, and other users purchase reports. Likewise, census facts are widely disseminated by trade associations, business journals, and newspapers. Volumes containing census statistics are available in most major public and college libraries. All 1982 data are available on microfiche from the U.S. Government Printing Office and most data on computer tape from the Census Bureau. Finally, the more than 50 State Data Centers also are suppliers of economic and agriculture censuses statistics.

AUTHORITY AND SCOPE OF THE ECONOMIC AND AGRICULTURE CENSUSES

The economic and agriculture censuses are required by law under title 13 of the United States Code, sections 131, 191, and 224, which directs that they be taken at 5-year intervals for the years ending in 2 and 7. The 1982 Economic and Agriculture Censuses covered manufacturing, mining, construction industries, retail trade, wholesale trade, service industries, selected transportation activities, and agriculture. Special programs also cover minority-owned and women-owned businesses. The next economic censuses are scheduled to be taken in 1988 for the year 1987.

METHOD OF ACCOUNTING AND TIME COVERED

For the census report, respondents could use any system of accounting by which they maintained their books. Therefore, reports could be based on cash, accrual, or completion of contract methods of accounting.

A report was supposed to cover the calendar year 1982. If that involved considerable costs, fiscal year reporting was permitted if it did not produce great differences. However, all payroll and employment figures had to be reported for the calendar year.

ENTERPRISE STATISTICS

General

The 1982 Enterprise Statistics is a series of publications based on data collected in the 1982 Censuses of Distributive Trades and Service Industries, Manufactures, Mineral Industries, Construction Industries, and Agriculture. These reports include: "General Report on Industrial Organization" and "Auxiliary Establishment Report."

The publication,"General Report on Industrial Organization", is based on responses from the many different 1982 Economic and Agriculture Censuses report forms. Each of the economic census questionnaires include several general questions such as kind of business, dollar volume of business, number of employees, amount of payroll, and company affiliation. The questions on the agriculture census questionnaires that coincide with the economic census questions are employment, annual payroll, and dollar volume of business. The resulting tables furnish comprehensive data on the industrial organization, size structure, and legal form of organization of all census reporting firms and the establishments they own or control. Additionally a separate economic census report form is sent to large companies with 500 employees or more. The resulting tables show selected financial statistics of large companies.

The publication, "Auxiliary Establishment Report", presents data on separately reported auxiliary units of multiestablishment firms. The primary functions of these establishments are to manage, administer, service, or support the activities of the other establishments of the company. The tables furnish detailed financial statistics of auxiliaries by industry classification of the owning company, industry classification of the operating establishments they service, the type of management or supporting service function they provide, their employment size, and their geographic location.

Scope

The 1982 Enterprise Statistics program covered manufacturing, mining, construction industries, distributive trades, selected service industries, and agricultural production (only included in the "General Report on Industrial Organization"). This was essentially the same as the scope of the economic censuses, except the censuses included certain transportation services and a broader range of service industries. (See "Comparability of Data: Scope" section of Appendix A. Technical Notes.) Only employer firms were included in the "General Report on Industrial Organization."

How the Data are Presented

This report presents census data collected for establishments (i.e., individual farms, stores, factories, mines, etc.) aggregated to the company level, using the company affiliation information obtained from each business and industrial firm or agricultural organization covered in the 1982 Economic Censuses. Virtually all economic and agriculture censuses publications present information only for establishments. This publication, however, is unique among census reports in that it provides data for entire companies and their owned establishments. An establishment is defined as a business or industrial unit at a single physical location which produces or distributes goods or performs services. A company is a business organization consisting of all establishments under common ownership or control.

Company Statistics

The company statistics shown in this report are organized into the following 4 sections:

Company industrial and structural organization—Company and establishment crosstabulations are prepared based on the entire company's primary industrial activity. These crosstabulations provide, within the analytical framework of a specifically designed enterprise classification system, detailed census data for studying the patterns of vertical integration and diversification among agricultural and industrial firms.

Size—Size structure of companies is shown by employment size, receipts size, and number of owned establishments.

Legal form of organization—Company data for each SIC level and enterprise industry category are shown by legal form of organization: corporation, partnership, sole proprietorship, and other legal forms.

Large companies—Detailed financial data are shown for selected data inquiries requested on form ES-9100. The ES-9100 "Enterprise Summary Report" was mailed to companies with 500 employees or more.

MICROFICHE

The data in this report are available on microfiche. Microfiche reports are sold by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

SPECIAL TABULATIONS

Special tabulations of 1982 Enterprise Statistics data may be obtained on computer tape or in tabular form. The data will be in summary form and subject to the same rules prohibiting disclosure of confidential information (such as name, address, kind of business, or other data for individual business establishments or companies) as are the regular publications.

Special tabulations are prepared on a cost basis. A request for a cost estimate, as well as exact specifications on the type and format of the data to be provided, should be directed to the Chief, Economic Surveys Division, Bureau of the Census, Washington, D.C. 20233.

ABBREVIATIONS AND SYMBOLS

The following abbreviations and symbols are used in this publication:

—	Represents zero.
(D)	Withheld to avoid disclosing data for individual companies.
(NA)	Not available.
n.e.c.	Not elsewhere classified.
(X)	Not applicable.
(Z)	Less than half the unit shown.

Note: Employment size class is represented by one of the following symbols: A—Less than 20 employees; B—20 to 99 employees; C—100 to 249 employees; D—250 to 499 employees; E—500 to 999 employees; F—1,000 to 2,499 employees; G—2,500 to 4,999 employees; H—5,000 to 9,999 employees; I—10,000 to 24,999 employees; J—25,000 to 49,999 employees; K—50,000 to 99,999 employees; L—100,000 employees or more.

[1]Beginning in the 1982 Economic Census, all respondents were requested to report inventories at cost or market prior to making any adjustments necessary to convert to LIFO value. This is a change from prior censuses in which respondents reported "book" value. "Book" value of 1981 and 1982 inventories is approximately the same as the total of columns "E" plus "H" and "I" and "L" plus "O" and "P", respectively. ("Book" value approximates the current cost of inventories not subject to LIFO costing, plus the LIFO value of inventories subject to LIFO costing.)

Note: Employment size class is represented by one of the following symbols: A—Less than 20 employees; B—20 to 99 employees; C—100 to 249 employees; D—250 to 499 employees; E—500 to 999 employees; F—1,000 to 2,499 employees; G—2,500 to 4,999 employees; H—5,000 to 9,999 employees; I—10,000 to 24,999 employees; J—25,000 to 49,999 employees; K—50,000 to 99,999 employees; L—100,000 employees or more.

APPENDIX A.
Technical Notes

SOURCES OF DATA

Multiestablishment Companies

Since 1971, the Bureau of the Census has conducted an annual report of organization survey of multiestablishment companies. Prior to the 1982 Economic Censuses, every multiestablishment company, with more than 50 employees, was required to complete census form NC-9901, Report of Organization, to determine its organizational and industrial structure as of the end of 1981. Specifically, each company was asked to update and correct a list of individual establishments owned or controlled by either the parent company or its subsidiaries. From the response, the Bureau of the Census was able to select and preaddress the appropriate 1982 census report for each establishment of each company. A company received a separate establishment report form for each physical location at which industrial and business activities within the scope of the 1982 Economic Censuses were conducted. As described by the Standard Industrial Classification (SIC) Manual[1], companies engaged in distinctly different lines of activity at one location were required to submit a separate establishment report for each activity if separate records were maintained and if the various activities were economically significant. Also, when more than one business (legal entity) was operated at a single location, each was regarded as a separate establishment for the censuses.

In addition to preparing a separate census report for each establishment producing or distributing goods or providing services to the general public or other business firms, each company covered in the economic censuses was asked to identify and report separately all auxiliaries. The primary functions of these establishments are to manage, administer, service, or support the activities of the operating establishments of the company.

During the actual censuses, information on company-establishment relationships and parent-subsidiary affiliations was confirmed or revised by including inquiries requesting information from firms either owning or controlling other companies or owned or controlled by another company in order to identify all subsidiary or parent firms.

Single-Establishment Companies

Single-establishment companies are classified as either: employer firms or nonemployer firms.

Employer firms—The Bureau of the Census created a mailing list of all employer firms engaged in industrial activities operating within the scope of the economic censuses by using a name and address computer file of all active businesses listed in the records of the Internal Revenue Service (IRS) as having one or more paid employees, and a comparable name and address file of employers from the records of the Social Security Administration (SSA) containing the industry codes assigned to each business. The mailing list of single-establishment firms was developed by deleting from the initial list the records of all multiestablishment companies identified in the annual survey of multiestablishment companies.

In an effort to reduce both the costs of the censuses and the reporting burden on small businesses, single-establishment employers with payrolls below specified values, which varied by industry, were excused from filing 1982 censuses reports. (The quarterly payroll data reported on IRS form 941 was used to determine whether a firm was to receive a report form.) Instead, data on employment, payrolls, and sales were obtained from Federal payroll and income tax returns filed with the IRS. For minerals, construction, and manufacturing industries, other data items normally collected on the individual establishment reports were estimated either from industry averages or from sample data collected from other small companies. Based on the IRS data and any estimated items, a substitute census establishment report was generated for each "nonmail" single-establishment employer company. This procedure relieved the censuses reporting burden for many small business employers.

Nonemployer firms—The mailing list of employer firms does not include all single-establishment firms; excluded are firms with no paid employees. Since these small businesses (usually operated by sole proprietors or working partners and their unpaid family members) are not subject to payroll taxes, they were not included in either the IRS file of business firms or the SSA file of industry classifications used to prepare the single-establishment mailing list.

Because of the statistical significance of these small businesses in the construction, retail trade, and selected service industries, special arrangements were made with the IRS to obtain business receipts, industrial classifications, and geographic locations of these firms from their Federal income tax returns.

In retail trade and selected service industries, only the returns reporting annual receipts of $1,000 or more were tabulated. The construction industries did not employ any such cutoffs.

Agriculture Census

The mailing list for the 1982 Census of Agriculture included all individuals, businesses, and organizations identified as being associated with agriculture. The list was assembled from the records of the 1978 census, Internal Revenue Service, Social Security Administration, U.S. Department of Agriculture, other government agencies, trade associations, and other agriculture-related organizations. The mailing list of single-establishment farms was developed by deleting the records of farms owned

[1]**Standard Industrial Classification Manual: 1972.** For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Stock No. 041-001-00066-6. **1977 Supplement.** Stock No. 003-005-00176-0.

by multiestablishment companies from the mailing list. Two report form versions were used to minimize the reporting burden on small farms, including a 5-page sample form and a 4-page nonsample form. The sample form contained all of the items included on the nonsample form plus the sample items. Sample forms were mailed to 25 percent of all farms, including all farms operated by multiestablishment companies, all large and specialized farms (based on expected sales, acres, or standard industrial classification), all farms in Alaska and Hawaii, and approximately 17 percent of all other farms. Payroll and employment data were collected only on the sample report forms; sales and other data were collected on all report forms. Thus, the sample forms have been weighted to represent all farms in this publication.

Company Data

In presenting data on company-establishment relationships in this report, two distinct types of statistics are shown: company data and establishment data. Company data refer to consolidated company-wide statistics which may represent either statistical aggregates of reported establishment data, or net, unduplicated totals reported by companies only at the enterprise level, as explained below. Establishment data in this report refer to statistical aggregates compiled from the individual establishment reports collected in the economic censuses.

Each multiestablishment company that had 500 employees or more was mailed form ES-9100, Enterprise Summary Report, to obtain unduplicated, consolidated company totals of selected statistics. As in the 1977 Enterprise Statistics program, there was complete coverage for those multiestablishment economic companies with 500 employees or more. Information for large agricultural companies was not collected. The large company tables (tables 7-12) represent those economic companies with 500 employees or more.

For those multiestablishment companies that had less than 500 employees, the sales and receipts, capital expenditures, and inventory data were derived from aggregates of the reported establishment data.

For the nonresponse cases, data were obtained from various noncensus data sources, such as Standard and Poor's Corporation Records and Moody's Industrial Manual. Relationships between reported data items were used to estimate missing data items.

Censuses coverage of some data items, however, is not complete. In table 1, for example, the "all companies" totals column for each industry category does not necessarily equal the corresponding establishment aggregate columns (see Explanation of Terms for sales and receipts, capital expenditures, and inventories).

The company totals collected on form ES-9100 represent consolidated domestic totals for the parent company and all of its subsidiaries as of the end of 1982. The data reported on merged or acquired companies varied because of differing accounting practices. When an acquisition or merger was treated by the company as a "pooling of interest," the data reflected the combined full-year activities of both acquiring and acquired companies regardless of the date of acquisition. In these cases, the company data corresponded with the establishment data, since the establishment reports represented full-year activities, all of which were tabulated as part of the new parent company. However, when an acquisition or merger was treated by the acquiring company as a purchase, the company data normally reflected the operations of the acquired company only after the acquisition took place. Since the acquired company's establishment reports, representing a full year's activities, were credited to the acquiring company in the tabulations, the summary data supplied by the acquiring company on form ES-9100 had to be restated to provide comparable company and establishment totals. The restatement was based on information obtained either from the new parent company or from the ES-9100 filed by the acquired company. The company data in this report are primarily of the "pooling of interest" sort; the exact extent of the "purchase" accounting method is not known.

ASSIGNING INDUSTRY CODES

Establishments

Each establishment covered in the 1982 Economic and Agriculture Censuses was assigned an industry or kind-of-business code according to the 1972 Standard Industrial Classification (SIC) Manual[1] issued by the Office of Management and Budget, Executive Office of the President. Codes were chosen on the basis of the principal products made, lines of merchandise sold, type of construction activity performed, or services rendered by the establishment, as measured by the reported dollar volume of shipments, sales, or receipts during the census year. In some instances, the code was based on the principal materials or processes used. (For a comprehensive description of the Bureau's establishment classification procedures, see the introductory texts and appendixes of the various publications of the 1982 Economic and Agriculture Censuses.)

Companies

Each company covered in the 1982 Economic and Agriculture Censuses was classified in one of 214 enterprise industry categories (see appendix C). The two-digit SIC codes of companies shown in this publication are an aggregation of the detailed enterprise industry category codes.

Single-industry companies—For single-establishment and multiestablishment single-industry companies, the industry category classification was simply the enterprise category that was the equivalent of the single census industry (four-digit SIC code) in which the company's one or more establishments were primarily engaged.

Multi-industry companies—For the remaining multiestablishment, multi-industry companies, the enterprise industry classification was determined by first ascertaining the largest census industry division (manufacturing, wholesale trade, etc.) of each company; then, the primary enterprise industry category was selected from within that division. The determination of the largest census industry division and the primary enterprise industry category was made from establishment annual payroll data.

[1]**Standard Industrial Classification Manual: 1972.** For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Stock No. 041-001-00066-6. **1977 Supplement.** Stock No. 003-005-00176-0.

Establishment payroll data were chosen to be the determining factor for enterprise industry classification of multiestablishment, multi-industry companies because it was found to be the most meaningful economic measure common to all economic and agriculture censuses divisions. There are only three data items common to all economic and agriculture censuses establishment reports. They are: employment, annual payroll, and dollar volume of business.

The employment data item covers different time periods for different industries and is affected by seasonality. Sales and receipts may not accurately reflect the relative economic impact of companies in different industries. For example, sales and receipts of a wholesale broker represent gross sales made rather than commissions received and might be greater than that of a hotel—yet a hotel's sales and receipts would have more of an impact. Annual payroll, then, has been determined to be the best economic measure, i.e., the item represents a full calendar year and is a good indicator of relative economic impact.

Integrated petroleum extraction and refining companies—Because of the widespread practice of the larger petroleum extraction and refining companies in vertically integrating their activities, Industry Category 29A, Petroleum Refining (Including Integrated), was defined to include census (SIC) industries which cut across industry division lines. A company was classified in category 29A if it: (1) operated establishments both in SIC Industry 1311, Crude Petroleum and Natural Gas, and in Industry 2911, Petroleum Refining, and; (2) was primarily engaged in both industries, as reflected by its payroll. A company engaged in both industries 1311 and 2911, but primarily engaged in another industry category, was classified in that other category.

Nonintegrated petroleum companies primarily engaged in extracting or refining activities (industry 1311 or industry 2911, but not both), were classified in either the mineral industry category 13A or the manufacturing industry category 29A, using the standard classification procedure for coding multi-industry companies.

Farms—Farm operators are asked to complete an agriculture census form for each separate and distinct agricultural production operation for which separate records are maintained. A farm includes all land on which agricultural operations are conducted under the day-to-day control of one person, a partnership, or other legal form of organization. If an operator has substantial amounts of land or commodities in more than one county, the operator is required to complete separate report forms covering the agricultural operations in each county. These farms are classified as establishments of a multiestablishment company. If a person is the individual proprietor and operator of one agricultural operation, the senior partner in an agricultural partnership, and the hired manager of a third agricultural operation, the farms are classified as three single-establishment companies.

Operations producing crops, livestock, or poultry on a contract basis usually are classified as single-establishment companies. The contractor is not asked to complete an agriculture census form, because the contractor usually is classified as being engaged in manufacturing activities. Companies engaged in processing or other economic activities sometimes own farms; also, an individual proprietor may operate a greenhouse at one location and a retail nursery at a second location; these types of agricultural operations are classified as establishments of multiestablishment companies.

OUT-OF-SCOPE ACTIVITIES

To present meaningful company data encompassing all economic and agricultural activities, data on out-of-scope activities have been included in this publication if a majority of the owning company's payroll was classified as primarily within the scope of the 1982 censuses. On the other hand, if the firm was primarily engaged in activities outside the scope of the 1982 censuses, based on payroll, the data for its predominantly out-of-scope activities were excluded while the data for its in-census-scope establishments were included.[1] For example, in handling companies primarily engaged in public utilities activities, data on their primary activities were excluded, while data on their retail appliance stores were included.

COMPARABILITY OF DATA

The 1982 and 1977 censuses were conducted under similar conditions and procedures. However, strict comparability of the data for the two censuses is limited by the following factors:

Scope—In the 1977 program, agricultural industries were not part of the economic census program. In 1982, the agriculture census was conducted as part of the economic census, and agricultural production of crops and livestock was added to the scope of the Enterprise Statistics Program (excluding large company tables).

The scope of the 1982 enterprise program was also enlarged by including companies/establishments who report Federal income tax and are classified in the following industries: rooming houses and membership organization hotels; health services, except hospitals (dental laboratories were included in 1977); libraries, correspondence schools and vocational schools, and other miscellaneous educational services; social services; and accounting, auditing, and bookkeeping, and other miscellaneous services (engineering and architectual services were included in 1977). The census of service industries also covered these industries and, in addition, included (in separate tables) establishments not subject to Federal income tax in the above industries plus museums, art galleries, and botanical and zoological gardens; membership sports and recreation clubs; fairs; and selected membership organizations. These tax-exempt establishments were not included in scope of the 1982 enterprise program.

In the 1977 and previous enterprise statistics programs, "all companies" included companies with and without annual payroll. For 1982, "all companies" included only companies with annual payroll.

History—Historical comparability of data in each enterprise industry category is also affected by the large diversified companies which significantly changed their industrial activities "mix" between 1977 and 1982 through internal company growth or merger, acquisition, or disposal of subsidiaries with resulting shifts in their industry category classifications. Such classification "transfers" of company aggregates (e.g., tabulated in industry category "A" in 1977, but in industry category "B" in 1982) may constitute a significant part of the observed net historical changes in the company totals of some industry categories shown in this report.

[1]Similarly, the data from the company summary reports of primarily out-of-scope companies were adjusted, where necessary, to reflect only those activities within census scope.

Inventories—In 1977, inventories were reported on a percentage basis by valuation method and summed to 100 percent. The total value of inventories, thus, represented a mixture of valuation methods. In 1982, inventories were reported in dollar amounts, valued at LIFO costing and/or non-LIFO costing. If any inventory was valued using LIFO, then the amount of LIFO reserve and the LIFO value of the inventories was requested.

COMPARABILITY WITH OTHER PUBLICATIONS

Other Economic Census Publications

With the exception of the statistics reported by large companies on form ES-9100, the data used in preparing this report were obtained from 1982 Economic Censuses establishment report records. Since both the concepts and the coverage of the economic censuses were generally applicable to these tabulations, the comparable totals appearing in this report and the various 1982 Economic Censuses publications are virtually the same. It is important to note that establishment figures in this publication are based on the company classification of their owning firms, and are not directly comparable with any of the regular economic censuses totals, which were tabulated only on an establishment classification basis.

Establishment counts—The establishment counts appearing in this report differ significantly in some industries when compared with the establishment counts shown in the various economic censuses volumes.

The number of establishments shown in this report for wholesale, retail, and selected service industry categories were greater than their counterparts appearing in the censuses of distributive trades and service industries publications. This difference was primarily due to the censuses of distributive trades and service industries practice of excluding the counts of those establishments not in business at the end of the census year (but including their data on employment, payroll, etc.). However, such part-year-business establishments were counted in the enterprise statistics tabulations to maintain consistency across all other divisions.

Also, treatment of nonemployer firms will differ in agriculture, construction, retail, and service. For this report, nonemployer firms were not included in the tables.

Data totals—It was necessary to bring together, from each of the 1982 Economic Censuses, the computer records for all establishments under common ownership or control. Both single-establishment and assembled multiestablishment companies underwent various data edits and consistency checks. Specifically for multiestablishment companies, various editing checks were routinely made to verify the internal consistency of each company's establishment records when aggregated to company data totals. For the larger firms (those with 500 employees or more) various checks of the establishment data were also made against the totals available from their ES-9100. Significant errors in the establishment or company data records revealed by these edits also were corrected.

Whenever possible, the correction of such errors uncovered during the company edit of establishment records was also carried to the regular economic censuses tables. In many instances, however, the company edit operation came after the census industry totals had been published. Conversely, many of the corrections made during the review of the final censuses publication tables were made too late to be reflected in establishment computer records used as the basic source for this report. Although the more significant revisions were incorporated into the final computer tapes as late corrections, many of the smaller ones were not.

APPENDIX B.
Explanation of Terms

ANNUAL PAYROLL

Annual payroll in the economic census is defined as the combined amount of wages paid, tips reported, and other compensation, including salaries, vacation allowances, bonuses, commissions, sick-leave pay, and the value of payments in kind (such as free meals and lodging) paid to all employees before deductions for social security, income tax, insurance, union dues, etc. All forms of compensation are included, whether or not subject to income tax or FICA tax, with the exception of annuities, third party sick pay, and supplemental unemployment compensation benefits (even if income tax was withheld). For corporations, total payroll includes compensation paid to officers and executives; for unincorporated businesses, it does not include profit or other compensation of proprietors or partners. Payroll data for out-of-scope activities were developed from the form NC-9901, Report of Organization, for large companies or from the Internal Revenue Service (IRS) form 941 for small companies.

Annual payroll in the agriculture census is defined as the gross earnings paid during the calendar year to all hired farm and ranch workers, office workers, maintenance people, and so forth, engaged in performing work associated with the agricultural production operation. Payroll includes all forms of compensation (salaries, wages, commissions, paid bonuses, vacation and sick-leave pay) paid in cash or by check during the year before payroll deductions. Payroll also includes the salary paid to hired managers. The payroll figures do not include profit or other compensation of unpaid family members; payments to contractors, crew leaders, cooperatives, and other organizations hired to furnish a crew of laborers to perform agricultural jobs; salaries paid to workers for performing customwork or agricultural services for others; salaries paid to workers engaged in nonfarm activities; and the value of payments in kind, such as room and board and house rent received by hired workers from their employers.

AUXILIARIES

Auxiliaries are defined as establishments whose employees are primarily engaged in general and business administration; management; research, development, and testing; warehousing; electronic data processing; and other supporting services performed centrally for other establishments of the same company rather than for other companies or the general public.

Each auxiliary reported in the economic censuses was assigned a code based on the standard industrial classification (SIC) of the establishments within the company for which the auxiliary performed its supporting services. These "industry-serviced" codes reflect SIC major group (two-digit) or industry group (three-digit) rather than individual industry (four-digit) classifications, because the auxiliaries of the larger and more industrially diversified companies (which accounted for the bulk of auxiliary activities) typically served establishments classified in more than one industry group or industry.

CAPITAL EXPENDITURES

Capital expenditures are defined as all expenditures made during the year for which depreciation accounts are ordinarily maintained. Expenditures for new additions and alterations to plant, new machinery and equipment used for replacement or additions, capitalized development and exploration of mineral properties, and used plant and machinery acquired from others are considered capital expenditures. Expenditures for new plants or machinery under construction that were not yet in operation during the census year, capital leases entered into after January 1, 1982 and expenditures for machinery rented to others also are included. Capital expenditures do not include expenditures for land and depletable assets or the cost of maintenance and repairs normally charged as current operating expenses.

New capital expenditures are calculated as total capital expenditures minus expenditures made for used plant and machinery. The large company tables present new capital expenditures detail of buildings and structures, autos and trucks, computers and peripheral equipment, plus all other new machinery and equipment.

Where total new capital expenditures figures are shown in the tables for the mineral, construction, and manufacturing categories, the data for companies with less than 500 employees can be cumulated only for their operating mineral, construction, and manufacturing plants and their auxiliaries. The aggregates do not necessarily provide complete company totals.

COMPANY

A company is a business/agricultural organization consisting of one domestic establishment or more that the reporting firm specified under its ownership or control at the end of 1982. If a company owned or controlled other companies, all establishments of the subsidiaries are included as part of the owning or controlling company. In this report, the terms company, firm, and enterprise are used interchangeably.

To emphasize the extent of industrial diversification in the data shown, companies that operate establishments in only one of the 214 enterprise industry categories are distinguished from those that operate establishments in two or more industry categories or are engaged in at least one activity out-of-scope of the censuses: i.e., single-industry companies are distinguished from multi-industry companies. In making the "single-industry" versus "multi-industry" determination for a multiestablishment company, its auxiliaries and its sales branches are not included in making the type-of-company classification.

While all multi-industry companies must necessarily be multiestablishment, single-industry companies may be either single-establishment or multiestablishment. Single-industry firms are classified in the enterprise category that is the equivalent of the single census industry (four-digit SIC codes) in which the company's one or more establishments are primarily engaged.

DEPRECIABLE ASSETS

Depreciable assets are defined as the assets of a company and its subsidiaries for which depreciation and amortization accounts are ordinarily maintained. Depreciable assets are comprised of: (a) buildings and structures; and (b) machinery and equipment, and are stated at end-of-prior-year and end-of-current-year values. The gross value of such assets represent the acquisition cost (original cost) to the company, while the net value represents the gross value less accumulated depreciation and amortization. These depreciable assets data include the value of all improvements and new construction in progress but not yet completed at the end of the year. The value of machinery, equipment, buildings, structures, etc., owned by the company and subsidiaries but leased or rented to others is also included. Excluded are depreciable assets of a company and its subsidiaries in foreign countries.

It should be noted in comparing the end-of-prior-year and end-of-current-year depreciable assets data that most acquisitions occurring during 1982 are treated in the ES-9100 on a "pooling-of-interest" basis. However, noncomparability can result between end-of-prior-year and end-of-current-year depreciable assets when companies treat acquisitions as "purchases." For more information on the "purchase" treatment as well as the "pooling-of-interest" treatment of acquisitions, see the Sources of Data in appendix A.

DEPRECIATION

Depreciation is the process of allocating the cost of an asset to the period of benefit, or depreciation life of more than 1 year. Depreciation charged against assets acquired since the beginning of the year along with depreciation charged against assets sold or retired during the year are components of this category.

EMPLOYMENT

Employment in the economic census is defined as all employees, full-time and part-time, as reported on establishment payrolls during specified pay periods during 1982. Persons on paid sick leave, paid holidays, and paid vacations are included as employees, as are salaried officers and executives of corporations. However, proprietors and partners of unincorporated businesses are not considered employees.

The derivation of the 1982 employment figures varied somewhat among the different economic censuses. For establishments in the mineral, manufacturing, and construction industries, employment represents an annual average of the number of "production workers" on the payroll for any part of the pay periods including the 12th of March, May, August, and November, plus the number of "all other employees" on the payroll during the March 12th pay period.

All employment data except that for out-of-scope activities, are based on either data reported on individual establishment report forms or data from IRS form 941 for small employer firms not required to complete a census report. For out-of-scope activities, employment data are developed from the number of employees as of the March 12th pay period reported on the form NC-9901, Report of Organization.

Employment in the agriculture census is defined as all hired farm and ranch workers, including regular workers, part-time workers, seasonal workers, paid family members, and hired managers, reported by farm operators as working at any time during 1982. Farm workers include such persons as bookkeepers, office workers, and maintenance people whose employment is primarily associated with the agricultural production activities conducted even though they may not be doing agricultural work. The employment figures do not include proprietors and partners of unincorporated operations, unpaid family members, contract workers hired through a crew leader or contractor to perform agricultural jobs, workers engaged in performing customwork or agricultural services for others, and workers engaged in nonfarm activities.

ENTERPRISE

For this report, an enterprise is the same as a "company." See "company" for a detailed definition.

ENTERPRISE INDUSTRY CATEGORY

An enterprise industry category is a group of four-digit SIC industries that were specifically designed to relate to enterprises rather than to establishments. It is an adaptation of the four-digit SIC classification system to provide an industrial classification system that is meaningful in expressing consolidated company aggregates of the establishment data collected in the economic and agriculture censuses. For this purpose, various economic and statistical criteria were developed that are considered to be the most relevant in describing the economic characteristics of enterprises rather than establishments. These criteria, which are similar to those used in 1977, were as follows:

1. At least 50,000 employees in an industry or receipts of $2 billion or more.

2. An industry specialization ratio of at least 70 percent for nonmanufacturing and 60 percent for manufacturing.

3. Compatibility with the SIC systems for establishments and the enterprise SIC.

4. Compatibility with the 1977 Enterprise Statistics classifications system (where not incompatible with other criteria).

Enterprise industry categories are grouped to form industry divisions representing major sectors of the economy—construction, manufacturing, retail trade, etc.

ESTABLISHMENTS

An establishment in the economic census is defined as a business or industrial unit at a single physical location which produces or distributes goods or performs services. One significant deviation in this establishment concept occurs in the construction industry. Relatively permanent offices that have the responsibility for performing management and other administrative functions for one or more construction projects or sites are classified as operating construction establishments. However, an establishment primarily engaged in general administrative, management, or support functions performed centrally for one or more construction establishments is considered an auxiliary.

In the agriculture census, establishments include agricultural production establishments or farms. A farm is defined in the

agriculture census as any place from which $1,000 or more of agricultural products were sold or normally would have been sold during the census year. The agriculture census includes privately operated and government owned and operated farms, including farms operated by hospitals, penitentiaries, churches, schools, grazing associations, Indian reservations, and experimental and research farms.

FIRM

For this report, "firm" is the same as "company." See "company" for a detailed description.

FRINGE BENEFITS

Fringe benefits are defined as the employer costs for those benefits required by Federal and State law along with any additional company funded benefits.

Required by law—Payments to programs required under Federal and State legislation such as: employer's social security tax, unemployment tax, workers' compensation, and State Disability Insurance programs.

Voluntary programs—Employers reported the cost of all programs offered by the company, but not required by Federal or State legislation. For programs financed by employer and employee contributions, only the data on employer contributions were collected. These include benefits such as: (1) insurance premiums on hospital and medical plans, (2) life insurance premiums, (3) pension plans, (4) union negotiated benefits, (5) welfare plans, and (6) stock purchase plans. The total employer cost of fringe benefits added to annual payroll equals total compensation.

INDUSTRY SPECIALIZATION RATIO

An industry specialization ratio shows the relationship between the establishments engaged in the primary activities of companies in an industry and the activities of all their operating establishments (both primary and secondary). The ratio excludes those establishments classified as sales branches or auxiliaries.

It measures the extent to which companies classified in a given industry tend to mix their industrial activities. The lower the ratio, the less industrially specialized are the companies classified in the industry, or (inversely) the more industrially diversified they are.

INVENTORIES

Inventories are defined as the balance of goods on hand, such as raw materials, supplies, work-in-process, and finished goods and merchandise on hand for resale. In the 1982 censuses, the inventory inquiry was designed to collect unduplicated, consolidated information concerning all of the inventories owned by the enterprises and which are located within the United States. Inventories of multiestablishment enterprises were reported by the establishment responsible for the inventories, even if these inventories were held at a separate location. Data on end-of-prior-year and end-of-current-year inventories are obtained only for minerals, construction, manufacturing, and wholesale trade establishments, for auxiliaries, and for large companies on form ES-9100, Enterprise Summary Report. For more detailed descriptions of the specific measures used by the industries covered, see the respective 1982 Economic Censuses publications.

For 1977, companies were asked to report their method of valuation on a cost, market, retail or other basis. In 1982, companies were requested to report their inventories at cost or market using generally accepted accounting methods. Specifically, respondents were asked to report on a LIFO basis (LIFO reserve and LIFO value of inventories) and/or on a non-LIFO basis.

Where inventory figures are shown in the tables for the mineral, construction, manufacturing, and wholesale trade categories, the data for companies with less than 500 employees can be cumulated only for their operating establishments engaged in mineral, construction, manufacturing, wholesale trade and auxiliary activities. The aggregates do not necessarily provide complete company totals.

LARGE COMPANY

A large company is defined as having 500 employees or more. The qualifier of 500 employees is more for practical considerations inherent in the records used to prepare this report, rather than for economic or statistical considerations. The qualifier was chosen because enough large companies exist in most categories to permit publishing considerable data without disclosing the activities of individual companies.

LEGAL FORM OF ORGANIZATION

Legal form of organization is the method used to distinguish each company as an individual proprietorship, partnership, corporation, or other business entity. Each company covered in the 1982 and previous economic censuses was classified into specific legal forms of organization.

Individual proprietorships—Unincorporated companies owned by one person.

Partnerships—Unincorporated companies owned by two or more persons having financial interest in the business (joint ventures, except corporations, are included as partnerships).

Corporations—Companies legally incorporated under State laws including nontax-exempt cooperatives.

Other legal forms—Included in this group are cooperatives, estates, receiverships, government-owned liquor stores, etc. All agriculture cooperatives, including nontax-exempt cooperatives, are classified as "other legal forms."

MANUFACTURERS' SALES BRANCHES AND SALES OFFICES

Manufacturers' sales branches and sales offices are wholesale trade establishments that primarily distribute products manufactured by the owning company. In the SIC manual, manufacturers' sales branches and sales offices are classified as wholesale trade operating establishments and are treated that way in the publications of the census of wholesale trade.

PURCHASED ADVERTISING SERVICES

Purchased advertising services are those services purchased by companies for advertising, such as television, radio, and newspapers.

RENTAL PAYMENTS

Rental payments represent all payments made or accrued by a company or its subsidiaries during the year for plant and equipment rented or leased from other companies. Separately identified fees for leasing land, such as ground rents, are excluded. Capital leases are reported as assets and not as rental or leased payments.

ROYALTY PAYMENTS

Royalty payments are the compensation actually paid to unaffiliated organizations or individuals for the use of intangible property rights (patents, trademarks, copyrights, processes, use of natural resources, etc.).

SALES AND RECEIPTS

Sales and receipts are defined as the receipts for goods produced or distributed or services provided. Excluded from sales are nonoperating receipts, returns on investments and interest. Two types of sales and receipts figures were collected in the 1982 Economic and Agriculture Censuses and earlier economic censuses. The first type consists of gross sales and receipts reported by establishments, and included estimated values assigned to intra-company transfers of goods and services among establishments within the same company. The second type consists of net sales and receipts reported by companies (or estimates derived from census establishment data), excluding the values of intra-company transfers among their own establishments.

a. **Establishment sales and receipts**—Establishment sales and receipts are represented by various measures to show the concept of gross dollar volume of activity by establishments covered in the economic censuses. Wholesale trade (including manufacturers' sales branches and sales offices) and retail trade collected data on the "dollar volume of business" for the cash or credit sales of merchandise. Construction industries collected data on "business receipts" to directly reflect the dollar amount of goods sold and work done. Service industries gathered data on "operating receipts" which showed the total of all receipts from customers, patrons, or clients for services rendered and merchandise sold during the year, whether or not payment was received that year. From manufacturing and mineral industries, similar data were collected on "value of shipments" which reflect the net selling values of products. Sales in agricultural production industries are defined as the gross market value of all agricultural products sold or removed from the agricultural operation in 1982 regardless of who received the payment. Auxiliaries were asked to report sales to customers outside the company, but to exclude transactions with other establishments of the owning company or sales to customers or receipts for services already reported by other establishments of the owning company. All such data are included under the general term "sales and receipts" in this report.

   Because of duplication, the aggregates of these establishments' sales and receipts ordinarily exceed a firm's total net sales and receipts, which reflect only commercial transactions with outside customers. For more detailed descriptions of the specific sales and receipts measures used by the divisions covered, see the publications of the 1982 Economic and Agriculture Censuses.

b. **Company sales and receipts**—Some establishments of a multiestablishment company transfer part or all of their products to other establishments of the company for further processing or distribution, rather than shipping them directly to outside customers. Since these intra-company shipments are assigned approximate commercial values (for the basic economic census purpose of measuring gross output by the industry classification of establishments), the gross cumulation of establishment figures usually overstates the actual net sales and receipts of a company, especially those of the larger multiestablishment companies. The overstatement is partially offset by the lack of sales and receipts for establishments out of the scope of the censuses. Sales and receipts data for out-of-scope activities are reported by large companies on form ES-9100, Enterprise Summary Report.

   Unduplicated net sales and receipts figures for large companies are obtained from form ES-9100. The net figures for small multiestablishment companies are derived by aggregating and comparing the equivalent figures for: (1) the operating establishments of the company (i.e., the value of shipments reported by minerals and manufacturing plants and sales and receipts reported by construction, wholesale, retail, selected service, and agricultural production establishments), and (2) the manufacturers' sales branches and the auxiliaries. The larger of the two totals is considered the correct one. Many manufacturing companies, who also operated their own sales branches or sales offices, excluded the "markup" between the plant and the sales branch or sales office from their value of shipments. For this reason, the sales and receipts reported by the sales branches are the tabulated sales and receipts figures for the company.

   For single-establishment companies, sales and receipts data are obtained from establishment report forms or administrative records.

TYPE OF ORGANIZATION

Type of organization refers to the number of establishments operated by a company. A single-establishment company is one with only one establishment engaged in economic activities; a multiestablishment company is one with two or more establishments engaged in such activities. If a company is engaged in two or more distinctly different lines of economic activity (wholesale or retail trade, manufacturing, construction, service, mining, etc.) at the same physical location, and separate records can be prepared for each activity, each activity would be classified as a separate establishment.

VALUE ADDED

"Value added" is a derived economic measure used in the censuses of manufactures, mineral, and construction industries

to avoid duplication at the various industry levels of aggregation for value of shipments. When the establishment value of shipments' totals of SIC four-digit industries are added to three-digit and two-digit industry group totals in these industries, duplication is possible because the products of some industries are used as materials by others (e.g., when flour mill shipments are added to bakery shipments in the food industry group).

For construction industries, value added is equal to all business receipts less payments for construction work subcontracted to others and payments for materials, components, supplies, and fuels. For Enterprise Industry Category 15A, General Building Contractors, where land receipts are significant, value added is equal to all business receipts less land receipts, payments for construction work subcontracted to others, and payments for materials, components, supplies, and fuels.

For minerals industries, value added is derived by subtracting the cost of supplies used, minerals received for preparation, purchased machinery installed, purchased fuel, purchased electricity, and contract work from the sum of the value of shipments (mining products plus receipts for services rendered) and total capital expenditures. The result of the calculation is then adjusted by the addition of value added by merchandising operations (i.e., the difference between the sales value and the cost of merchandise sold without further processing).

For manufactures, value added is derived by subtracting the total cost of materials (including materials, supplies, fuel, electric energy, cost of resales, and contract work done by others) from the value of shipments, including resales and other receipts, and adjusting the resulting amount by the net change in finished products and work-in-process inventories between the end-of-prior-year and end-of-current-year.

For a few manufacturing industries (i.e., aircraft and shipbuilding) where value of work done is substituted for value of shipments, no adjustment is made for change in inventories. In a few other industries where value of production is collected, the inventory adjustment is made only on the basis of change in work-in-process inventories.

Statistics of value added are not available for wholesale, retail, service, and agricultural production industries because the various cost figures required for their calculation were not collected in the economic censuses. Therefore, comparisons of value added totals with other totals (such as employees, payroll, and sales and receipts) for an industry should be made with caution.

APPENDIX C.
Comparison of 1982 Enterprise Industry Categories and 1982 Standard Industrial Classifications

1982 enterprise industry category		1982 standard industrial classification	
Code	Title	Code	Title
	MINING		
10A	Metal mining	10	Metal mininig
11A	Coal mining	11	Anthracite mining
		12	Bituminous coal and lignite mining
13A	Oil and gas extraction	131	Crude petroleum and natural gas
		132	Natural gas liquids
13B	Oil and gas field services	138	Oil and gas field services
14A	Nonmetallic minerals, except fuels	14	Mining and quarrying of nonmetallic minerals, except fuels
	CONSTRUCTION		
15A	General building contractors	15	Building construction—general contractors and operative builders
		6552	Subdividers and developers, except cemeteries
16A	Highway and street construction	161	Highway and street construction, except elevated highways
16B	Heavy construction, except highway	162	Heavy construction, except highway and street construction
17A	Plumbing, heating, and air conditioning	171	Plumbing, heating (except electric), and air conditioning
17B	Painting, paper hanging, and decorating	172	Painting, paper hanging, and decorating
17C	Electrical work	173	Electrical work
17D	Masonry, stonework, and plastering	174	Masonry, stonework, tile setting, and plastering
17E	Carpentering and flooring	175	Carpentering and flooring
17F	Roofing and sheet metal work	176	Roofing and sheet metal work
17G	Concrete work	177	Concrete work
17H	Special trade contractors, n.e.c.	178	Water well drilling
		179	Miscellaneous special trade contractors
	MANUFACTURING		
20A	Meat packing plants	2011	Meat packing plants
20B	Prepared meats and poultry products	2013	Sausages and other prepared meat products
		2016	Poultry dressing plants
		2017	Poultry and egg processing
20C	Fluid milk	2026	Fluid milk
20D	Dairy products, n.e.c.	2021	Creamery butter
		2022	Cheese, natural and processed
		2023	Condensed and evaporated milk
		2024	Ice cream and frozen desserts
20E	Canned fruits and vegetables	2033	Canned fruits, vegetables, preserves, jams, and jellies
20F	Preserved fruits and vegetables, n.e.c.	2032	Canned specialties
		2034	Dried and dehydrated fruits, vegetables, and soup mixes
		2035	Pickled fruits and vegetables, vegetable sauces and seasonings, and salad dressings
		2037	Frozen fruits, fruit juices and vegetables
		2038	Frozen specialties

See footnotes at end of table.

1982 enterprise industry category		1982 standard industrial classification	
Code	Title	Code	Title
	MANUFACTURING—Con.		
20G	Grain mill products	204	Grain mill products
20H	Bread, cake, and related products	2051	Bread and other bakery products, except cookies and crackers
20I	Cookies and crackers	2052	Cookies and crackers
20J	Sugar and confectionery products	206	Sugar and confectionery products
20K	Fats and oils	207	Fats and oils
20L	Alcoholic beverages	2082	Malt beverages
		2083	Malt
		2084	Wines, brandy, and brandy spirits
		2085	Distilled, rectified, and blended liquors
20M	Bottled soft drinks and flavorings	2086	Bottled and canned soft drinks and carbonated waters
		2087	Flavoring extracts and flavoring syrups, n.e.c.
20N	Miscellaneous food and kindred products	209	Miscellaneous food preparations and kindred products
21A	Tobacco manufactures	21	Tobacco manufactures
22A	Weaving and finishing mills	221	Broad woven fabric mills, cotton
		222	Broad woven fabric mills, manmade fiber and silk
		223	Broad woven fabric mills, wool (including dyeing and finishing)
		226	Dyeing and finishing textiles, except wool fabrics and knit goods
22B	Hosiery	2251	Women's full length and knee length hosiery
		2252	Hosiery, except women's full length and knee length hosiery
22C	Knitting mills, n.e.c.	2253	Knit outerwear mills
		2254	Knit underwear mills
		2257	Circular knit fabric mills
		2258	Warp knit fabric mills
		2259	Knitting mills, n.e.c.
22D	Floor covering mills	227	Floor covering mills
22E	Yarn and thread mills	228	Yarn and thread mills
22F	Textile mill products, n.e.c.	224	Narrow fabrics and other smallwares mills: cotton, wool, silk, and manmade fiber
		229	Miscellaneous textile goods
23A	Men's and boys' suits and coats	231	Men's, youths', and boys' suits, coats, and overcoats
23B	Men's and boys' shirts and nightwear	2321	Men's, youths', and boys' shirts (except workshirts) and nightwear
23C	Men's and boys' clothing, n.e.c.	2322	Men's, youths', and boys' underwear
		2323	Men's, youths', and boys' neckwear
		2327	Men's, youths', and boys' separate trousers
		2328	Men's, youths', and boys' work clothing
		2329	Men's, youths', and boys' clothing, n.e.c.
23D	Women's and misses' blouses and dresses	2331	Women's, misses', and juniors' blouses, waists, and shirts
		2335	Women's, misses', and juniors' dresses
23E	Women's and misses' suits and coats	2337	Women's, misses', and juniors' suits, skirts, and coats
23F	Women's and misses' outerwear, n.e.c.	2339	Women's, misses', and juniors' outerwear, n.e.c.
23G	Women's and children's undergarments	234	Women's, misses', children's, and infants' undergarments
23H	Children's outerwear	236	Girls', children's, and infants' outerwear
23I	Apparel and accessories, n.e.c.	235	Hats, caps, and millinery
		237	Fur goods
		238	Miscellaneous apparel and accessories
23J	Miscellaneous fabricated textile products	239	Miscellaneous fabricated textile products
24A	Logging camps and logging contractors	241	Logging camps and logging contractors
24B	Sawmills and planing mills	242	Sawmills and planing mills

See footnotes at end of table.

1982 enterprise industry category		1982 standard industrial classification	
Code	Title	Code	Title
	MANUFACTURING—Con.		
24C	Millwork and plywood	243	Millwork, veneer, plywood, and structural wood members
24D	Wood buildings and mobile homes	245	Wood buildings and mobile homes
24E	Wood products, n.e.c.	244	Wood containers
		249	Miscellaneous wood products
25A	Wood household furniture	2511	Wood household furniture, except upholstered
		2517	Wood television, radio, phonograph, and sewing machine cabinets
25B	Upholstered household furniture	2512	Wood household furniture, upholstered
25C	Household furniture, n.e.c.	2514	Metal household furniture
		2515	Mattresses and bedsprings
		2519	Household furniture, n.e.c.
25D	Furniture and fixtures, n.e.c.	252	Office furniture
		253	Public building and related furniture
		254	Partitions, shelving, lockers, and office and store fixtures
		259	Miscellaneous furniture and fixtures
26A	Pulp, paper, and board mills	261	Pulp mills
		262	Paper mills, except building paper mills
		263	Paperboard mills
		266	Building paper and building board mills
26B	Miscellaneous converted paper products	264	Converted paper and paperboard products, except containers and boxes
26C	Paperboard containers and boxes	265	Paperboard containers and boxes
27A	Newspapers	271	Newspapers; publishing, publishing and printing
27B	Periodicals	272	Periodicals; publishing, publishing and printing
27C	Books	273	Books
27D	Greeting cards; and publishing, n.e.c.	274	Miscellaneous publishing
		277	Greeting card publishing
27E	Commercial printing and business forms	275	Commercial printing
		276	Manifold business forms
27F	Bookbinding and printing services	278	Blankbooks, looseleaf binders, and bookbinding and related work
		279	Service industries for the printing trade
28A	Industrial chemicals and synthetics	281	Industrial inorganic chemicals
		282	Plastics materials and synthetic resins, synthetic rubber, synthetic and other manmade fibers, except glass
		286	Industrial organic chemicals
28B	Drugs	283	Drugs
28C	Soap, cleaners, and toilet products	284	Soap, detergents, and cleaning preparations, perfumes, cosmetics, and other toilet preparations
28D	Paints and allied products	285	Paints, varnishes, lacquers, enamels, and allied products
28E	Agricultural chemicals	287	Agricultural chemicals
28F	Miscellaneous chemical products	289	Miscellaneous chemical products
29A	Petroleum refining (including integrated)	291	Petroleum refining
		131	Crude petroleum and natural gas
29B	Petroleum and coal products, n.e.c.	295	Paving and roofing materials
		299	Miscellaneous products of petroleum and coal
30A	Rubber products	301	Tires and inner tubes
		302	Rubber and plastics footwear
		303	Reclaimed rubber
		304	Rubber and plastics hose and belting
		306	Fabricated rubber products, n.e.c.
30B	Miscellaneous plastics products	307	Miscellaneous plastics products
31A	Footwear, except rubber	314	Footwear, except rubber

See footnotes at end of table.

1982 enterprise industry category		1982 standard industrial classification	
Code	Title	Code	Title
	MANUFACTURING—Con.		
31B	Leather and leather products, n.e.c.	311	Leather tanning and finishing
		313	Boot and shoe cut stock and findings
		315	Leather gloves and mittens
		316	Luggage
		317	Handbags and other personal leather goods
		319	Leather goods, n.e.c.
32A	Glass products	321	Flat glass
		322	Glass and glassware, pressed or blown
		323	Glass products, made of purchased glass
32B	Structural clay products	325	Structural clay products
32C	Ready-mix concrete	3273	Ready-mixed concrete
32D	Concrete and gypsum products, n.e.c.	3271	Concrete block and brick
		3272	Concrete products, except block and brick
		3274	Lime
		3275	Gypsum products
32E	Nonmetallic mineral products, n.e.c.	324	Cement, hydraulic
		326	Pottery and related products
		328	Cut stone and stone products
		329	Abrasive, asbestos, and miscellaneous nonmetallic mineral products
33A	Blast furnaces and steel mills	3312	Blast furnaces (including coke ovens), steel works, and rolling and finishing mills
33B	Gray iron foundries	3321	Gray iron foundries
33C	Steel and malleable iron foundries	3322	Malleable iron foundries
		3324	Steel investment foundries
		3325	Steel foundries, n.e.c.
33D	Primary steel products, n.e.c.	3313	Electrometallurgical products
		3315	Steel wire drawing and steel nails and spikes
		3316	Cold rolled steel sheet, strip, and bars
		3317	Steel pipe and tubes
		339	Miscellaneous primary metal products
33E	Nonferrous metals, except foundries	333	Primary smelting and refining of nonferrous metals
		334	Secondary smelting and refining of nonferrous metals
		335	Rolling, drawing, and extruding of nonferrous metals
33F	Nonferrous foundries	336	Nonferrous foundries (castings)
34A	Metal cans and shipping containers	341	Metal cans and shipping containers
34B	Cutlery, hand tools, and hardware	342	Cutlery, hand tools, and general hardware
34C	Plumbing and heating, except electric	343	Heating equipment, except electric and warm air; and plumbing fixtures
34D	Fabricated structural steel	3441	Fabricated structural metal
34E	Metal doors, sash, and trim	3442	Metal doors, sash, frames, moldings, and trim
34F	Structural metal products, n.e.c.	3443	Fabricated plate work (boiler shops)
		3444	Sheet metal work
		3446	Architectural and ornamental metal work
		3448	Prefabricated metal buildings and components
		3449	Miscellaneous metal work
34G	Screw machine products, bolts, etc.	345	Screw machine products, and bolts, nuts, screws, rivets, and washers
34H	Metal forgings	3462	Iron and steel forgings
		3463	Nonferrous forgings
34I	Metal stampings	3465	Automotive stampings
		3466	Crowns and closures
		3469	Metal stampings, n.e.c.
34J	Metal services, n.e.c.	347	Coating, engraving, and allied services
34K	Ordnance and accessories, n.e.c.	348	Ordnance and accessories, except vehicles and guided missiles
34L	Fabricated wire products	3495	Wire springs
		3496	Miscellaneous fabricated wire products

See footnotes at end of table.

[1]These are new enterprise industry categories added for 1982 because of the expanded scope of the 1982 enterprise statistics program.
[2]These SIC industries include both taxable and tax-exempt operations; however, the enterprise program includes only the taxable establishments.

APPENDIX D.
Report Form

U.S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS
FORM

ES-9100

1982 ECONOMIC CENSUSES

ENTERPRISE SUMMARY REPORT

O.M.B. APPROVAL NO. 0607-0886: EXPIRES 11/84

NOTICE – Response to this inquiry is required by law (title 13, U.S. Code). By the same law, your report to the Census Bureau is **confidential.** It may be seen only by sworn Census employees and may be used only for statistical purposes. The law also provides that copies retained in your files are **immune from legal process.**

Please complete this form and RETURN TO:
BUREAU OF THE CENSUS
1201 East Tenth Street
Jeffersonville, Indiana 47134

DUE DATE: FEBRUARY 15, 1983

If you cannot file by the due date, a time extension request should be sent to the above address; please include your 11-digit Census File Number (CFN).

Note — *Please read the instructions before answering the questions.*

CENSUS USE ONLY

In correspondence pertaining to this report, please refer to this **Census File Number (CFN)**

Employer Identification (EI) Number

ES-9100

Please correct errors in name, address, and ZIP code. ENTER street and number if not shown.

IMPORTANT — This is an enterprise summary report

GENERAL INSTRUCTIONS

Purpose of this form

- The purpose of this form is to obtain accurate, unduplicated (NET) consolidated information for all domestic activities of your enterprise.

What is an enterprise?

- An enterprise is a business, service, or membership organization consisting of one or more establishments under common, direct, or indirect ownership or control.
- An enterprise is the highest level of establishment aggregation. If an enterprise owns or controls subsidiary companies or firms, all establishments of the subsidiaries are included as part of the owning or controlling enterprise.
- An enterprise may vary in composition ranging from a single legal entity (e.g., corporation, partnership, etc.) to a complex family of legal entities under common ownership or control.

What should be reported?

- Include your enterprise's activities in all 50 States and the District of Columbia. Do not include activities in foreign countries or U.S. possessions such as Puerto Rico, Guam, etc., if any, except for reporting foreign assets in item I.
- Include all subsidiaries whether or not they are consolidated in your enterprise's books.
- Consolidate all domestic activities whether or not they are covered in the 1982 Economic Censuses by individual report forms.
- Report consolidated, net information. Exclude domestic intra-enterprise transfers.
- If book figures are not available, enter your best estimate. Be sure to complete every item. Enter "0" in items where appropriate.
- For assistance in completing this form, call the Bureau's Enterprise Statistics Branch (301) 763–7078.

HOW TO REPORT DOLLAR FIGURES

Value figures may be reported in dollars or rounded to thousands

Example: If a figure is $1,125,628, report either

	Mil-lions (000)	Thou-sands (000)	Dol-lars (000)
● *PREFERRED method*	1	126	
Acceptable method	1	125	628

Item A – SALES AND RECEIPTS IN 1982

Report consolidated net sales and business receipts of your enterprise as reported on your income statement excluding sales or other taxes collected.

INCLUDE
- Operating receipts from taxable operations as well as total revenues from tax-exempt activities
- Export transfers to your foreign subsidiaries

EXCLUDE
- Domestic intra-enterprise transfers
- Sales by foreign subsidiaries
- Nonoperating income
- Sales and other taxes collected and paid directly to federal, state, or local taxing agencies

	Key	Mil.	Thou.	Dol.
1. Sales and other operating receipts in 1982	010			

Item B – PAYROLL AND EMPLOYMENT

PAYROLL

INCLUDE
- Gross earnings paid to employees prior to such deductions as:
  - Employee's Social Security contributions
  - Withholding taxes
  - Group insurance premiums
  - Union dues
  - Savings bonds
- All wages and salaries including:
  - Commissions and paid bonuses
  - Dismissal pay
  - Vacation and sick pay
  - Cash equivalent of compensation paid in kind
- Salaries of officers if a corporation

EXCLUDE
- Payments to proprietors or partners of unincorporated businesses
- Employer's cost for fringe benefits (supplemental labor costs)

EMPLOYMENT

INCLUDE
- Paid employees during the pay period including March 12, 1982
- Persons on paid sick leave, paid holidays, and paid vacations
- Full- and part-time employees

EXCLUDE
- Proprietors or partners of unincorporated businesses

	Key	Mil.	Thou.	Dol.
PAYROLL IN 1982 BEFORE DEDUCTIONS				
2. Total **ANNUAL** payroll	030			
3. **FIRST QUARTER** payroll	031			
EMPLOYMENT IN 1982			Number	
4. Number of paid employees for the pay period including March 12	032			

Item C – EMPLOYER'S COST FOR FRINGE BENEFITS IN 1982 (SUPPLEMENTAL LABOR COSTS)

REQUIRED BY LAW – Include payments for:
- Employer's Social Security tax
- Unemployment tax
- Workmen's compensation insurance
- State disability insurance programs

VOLUNTARY PROGRAMS – Include payments for:
- Insurance premiums on hospital and medical plans
- Life insurance premiums
- Pension plans
- Union negotiated benefits
- Welfare plans
- Stock purchase plans

	Key	Mil.	Thou.	Dol.
5. Legally required programs	035			
6. Voluntary programs	036			
7. **TOTAL fringe benefits – Sum of lines 5 and 6** →	037			

Item D – SELECTED OPERATING EXPENSES IN 1982

Line 8 – Royalty payments – Report amount paid to unaffiliated organizations or individuals for the use of intangible property rights (patents, trademarks, copyrights, processes, use of natural resources, etc.).

Line 9 – Advertising services – Report the amount paid to others for advertising services.

Lines 10–13 – Rental payments (excluding land) – Report rental payments made to other enterprises for use of buildings, structures, machinery, and equipment. Rental payments for buildings and structures should not include the land on which they stand, if this separation can be made in a reasonable way.

INCLUDE
- Payments made to others for use of such depreciable assets as buildings, structures, machinery, and equipment

EXCLUDE
- Separately identified fees for leasing of land on which buildings and structures are erected
- Capital leases (These should be reported as assets.)

	Key		Mil.	Thou.	Dol.
8. Did this enterprise make royalty payments for the use of intangible property rights in 1982?	110	1 ☐ YES – *Report amount here* → 2 ☐ NO	111		
9. Did this enterprise purchase advertising services in 1982?	112	1 ☐ YES – *Report amount here* → 2 ☐ NO	113		
10. Did this enterprise make rental payments, excluding land, in 1982?	100	1 ☐ YES – *Go to line 11* 2 ☐ NO – *SKIP to item E*			
11. Rental payments for use of buildings and structures	101				
12. Rental payments for use of machinery and equipment	102				
13. **TOTAL rental payments – Sum of lines 11 and 12** →	103				

PENALTY FOR FAILURE TO REPORT

CONTINUE ON PAGE 2 →

Item E – VALUE OF INVENTORIES

This inventory inquiry is designed to collect unduplicated, consolidated information concerning all of the inventories owned by your enterprise, and which are located within the United States. The sum of the inventories of all domestic establishments of your enterprise should be approximately equal to the total inventory of your enterprise after adjusting for valuation differences.

INCLUDE • Inventories in transit for which your enterprise has taken title
• Finished products
• Work in process
• Materials, supplies, fuels, etc., which are for resale or for further fabrication

EXCLUDE • Inventories owned by others but held by your enterprise
• Items not held for resale, such as fixtures, equipment, and supplies

NOTE – Sum of lines 16a and 16b should equal total inventories on line 15 AND sum of lines 17a and 17b should equal the amount on line 16b.

	End of 1982				End of 1981			
14. Did this enterprise have inventories at the end of the year specified?	120 1 ☐ YES 2 ☐ NO				130 1 ☐ YES 2 ☐ NO			
	If "No" for both years, SKIP to Item F							
	Key	Mil.	Thou.	Dol.	Key	Mil.	Thou.	Dol.
15. Report total inventories at cost or market using generally accepted accounting methods. (For inventories at LIFO cost use the sum of the LIFO amount plus the LIFO reserve when completing lines 15 through 16b) – **Sum of lines 16a and b** →	121				131			
16. a. Report the amount of total inventories on line 15 which is not subject to LIFO costing.	122				132			
b. Report the amount of total inventories on line 15 which is subject to LIFO costing – **Sum of lines 17a and b**	123				133			
17. a. Report the amount of LIFO reserve associated with the inventories on line 16b.	124				134			
b. Report the LIFO value of inventories on line 16b.	125				135			

Item F – CAPITAL EXPENDITURES DURING 1982 (EXCLUDING LAND AND MINERAL RIGHTS)

Report all costs that are chargeable to asset accounts and for which depreciation or amortization reserves are maintained. (See instructions in item G for a complete description of depreciable assets.) Include all items obtained through a capital lease.

INCLUDE • **Line 18c** – Production machinery, office equipment, and special tools having an estimated useful life of more than one year. Report replacements as well as additions to capacity.
• **Line 19** – New construction, major alterations, capitalized repairs, and improvement of buildings both completed and in progress but not completed at the end of 1982. Include expenditures for structures which, on completion, will be sold and leased back to you.
• **Line 21** – Capitalized expenditures for oil and gas field and other mineral property explorations; for the drilling of oil, gas, dry, and service wells; and for tangible assets

EXCLUDE • Cost of land and mineral rights, such as producing or nonproducing leases
• Cost of maintenance and repairs charged as current operating expenses
• Capital expenditures by subsidiaries in foreign countries and U.S. possessions

	Key	Mil.	Thou.	Dol.
18. New machinery and equipment				
a. New automobiles, trucks, trailers, special purpose vehicles, etc., for highway use	071			
b. New computers and peripheral data processing equipment	072			
c. All other expenditures for new machinery and equipment	073			
d. **TOTAL new machinery and equipment – Sum of lines a through c** →	074			
19. New buildings, structures, and additions to plant	075			
20. Used plant and used equipment acquired from others	076			
21. Capitalized development and exploration of mineral properties	077			
22. **TOTAL capital expenditures – Sum of lines 18d through 21 – *Enter total here and on line 27*** →	078			

Item G – GROSS VALUE AND CHANGES IN GROSS VALUE OF DEPRECIABLE ASSETS DURING 1982

Report the gross value of depreciable assets for which depreciation or amortization accounts are ordinarily maintained. Gross value represents the acquisition cost to your enterprise. Also report changes in the gross value of depreciable assets during 1982. If mergers and acquisitions are not treated as a "pooling of interest," enter the value of the acquired assets on line 26.

INCLUDE • Depreciable assets (buildings, structures, machinery, equipment, etc.) and amortizable assets (special tools) for all domestic establishments and facilities
• Value of depreciable assets owned by this enterprise, but rented or leased to others under an operating lease agreement
• Value of all capitalized drilling and completion costs
• Value of depreciable assets obtained through capital or tax leases
• Assets sold, retired, scrapped, destroyed, etc., on line 29

EXCLUDE • Value of land and depletable assets (timber and mineral rights) (Include on line 37)
• Current assets (inventories, cash, accounts receivable, etc.) and intangible assets (goodwill, patents, copyrights, etc.) (Include on line 37)
• Value of depreciable assets in foreign countries and U.S. possessions (Include on line 38)
• Value of land and mineral rights; such as producing or nonproducing leases, bonus payments, royalties and overriding mineral interests, and fee land (Include on line 37)
• Value of depreciable assets owned by your enterprise, but leased to others under a capital or tax lease agreement

GROSS VALUE OF DEPRECIABLE ASSETS (USUALLY ORIGINAL COST)	End of 1982 Key	Mil.	Thou.	Dol.	End of 1981 Key	Mil.	Thou.	Dol.
23. Buildings and structures	081				084			
24. Machinery and equipment	082				085			
25. **TOTAL – Sum of lines 23 and 24** →	083				086			
• *Transcribe 1981 total to line 26 below*								
CHANGES IN GROSS VALUE OF DEPRECIABLE ASSETS	Key	Mil.	Thou.	Dol.				
26. Gross depreciable assets, end of 1981 (should equal the 1981 total in line 25)	040							
27. Total capital expenditures during 1982 (should equal line 22)	041							
28. Other acquisitions by your enterprise during 1982	042							
29. Deductions from depreciable assets during 1982	043							
30. **Gross depreciable assets, end of 1982 – Sum of lines 26 through 28 minus line 29 (should equal the 1982 total in line 25)** →	044							

Item H – CHANGES IN ACCUMULATED DEPRECIATION DURING 1982

INCLUDE • Total depreciation and amortization reserves for the assets included in item G
• Additions made to depreciation reserves during 1982 for assets owned at the beginning of the year or acquired during the year

EXCLUDE • Depletion reserves for intangible assets
• Depreciation of assets held in foreign countries and U.S. possessions

	Key	Mil.	Thou.	Dol.
31. Accumulated depreciation as of the end of 1981	090			
32. Depreciation charged against assets during 1982	091			
33. Additions charged to other accounts during 1982	092			
34. Deductions from reserves for retirements, renewals, and replacements during 1982	093			
35. **Accumulated depreciation as of the end of 1982 – Sum of lines 31 through 33 minus line 34** →	094			

Item I – TOTAL ASSETS, END OF 1982

Report the balance sheet assets on a consolidated basis.

INCLUDE • **Lines 36 and 37** – Only domestic (nonforeign) assets
• **Line 37** – Current and other assets for which depreciation or amortization reserves are NOT maintained, such as inventories, cash, investments, accounts receivable, etc. Also include depletable and intangible assets such as land, timber, mineral rights, goodwill, patents, copyrights, etc. Report all other assets on a net basis of all reserves and allowances.
• **Line 38** – All assets in foreign countries and U.S. possessions, regardless of type, reported on a net basis of all reserves, allowances, and accumulated depreciation
• **Line 39** – Total assets of your enterprise as reported on your balance sheet

	Key	Mil.	Thou.	Dol.
36. Net value of depreciable assets (should equal line 30 minus line 35)	060			
37. Other assets	061			
38. Net foreign assets	062			
39. **TOTAL assets – Sum of lines 36 through 38** →	063			

Item J – CAPITAL LEASES DURING 1982

Report the value of all depreciable assets obtained through capital leases during 1982 at the market value when they were acquired. Do not include assets either obtained through operating leases or owned by this enterprise but leased to others under a capital lease agreement.

	Key	Mil.	Thou.	Dol.
40. Did this enterprise acquire new assets through capital leases during 1982? 140 1 ☐ YES – *Report the value of capital lease assets* → 2 ☐ NO	141			

REMARKS – Please use this space for any explanations that may be essential in understanding your reported data.

Item K – CERTIFICATION – This report is substantially accurate and has been prepared in accordance with instructions.

PUBLICATION PROGRAM

1982 ENTERPRISE STATISTICS

Publications of the 1982 Enterprise Statistics are described below. Publications order forms for the specific reports may be obtained from any Department of Commerce district office or from Data User Services Division, Customer Services (Publications), Bureau of the Census, Washington, D.C. 20233.

The enterprise statistics program consists of summary tabulations of the data obtained from the various censuses (manufactures, mineral industries, distributive trades, service industries, construction industries, and agriculture industries) included within the scope of the 1982 Economic and Agriculture Censuses conducted by the Bureau of the Census. Similar programs were conducted in the 1954, 1958, 1963, 1967, 1972, and 1977 Economic Censuses. The economic and agriculture censuses were conducted concurrently for the first time in 1982.

Essentially, the enterprise statistics program involves aggregating the census data records of establishments that are under common ownership or control and assigning company codes to show various economic characteristics of the firms that own or control the establishments. Statistics for the enterprise-establishment relationships are tabulated by type of company organization, by company size, and by industry classification. Data are also cross tabulated to indicate company industrial diversification patterns. One special group of establishments, called auxiliaries, are examined in detail in a separate publication.

General Report on Industrial Organization—1 report (ES82-1)

This report presents data on structural patterns of American industrial organization in terms of the primary industrial activity of companies, their employment and sales size, industry specialization, and other economic characteristics for all 1982 census-reporting firms and the establishments they own or control. The enterprise classification system, similar to the standard industrial classification system, is used to determine company activity. Also included in this report are company-establishment cross tabulations, showing the patterns of vertical integration and diversification among industrial and agricultural firms. Detailed financial data is presented for large companies only.

Auxiliary Establishment Report—1 report (ES82-2)

This report presents data on separately reported auxiliary units of multiestablishment firms covered in the 1982 Economic Censuses. Data for these special establishments are distributed by the industry classification of the owning company, the industry classification of the operating establishments they service, by the type of management or supporting service function they provide, by their employment size, and by their geographic location. Detailed statistics are provided to show their sales and receipts, end-of-year inventories, capital expenditures, and gross fixed assets for auxiliary establishments.

Microfiche

All published data are also available on microfiche.

OTHER ECONOMIC CENSUSES REPORTS

Data on retail trade, wholesale trade, service industries, construction industries, manufactures, mineral industries, transportation, minority-owned business enterprises, and women-owned businesses also are issued as part of the 1982 Economic Censuses. A separate series of reports covers the censuses of outlying areas—Puerto Rico, Virgin Islands of the United States, Guam, and the Northern Mariana Islands. Appropriate announcements and order forms describing these reports are available free of charge from Data User Services Division, Customer Services (Publications), Bureau of the Census, Washington, D.C. 20233.
